

Introducing CoreSense™ Protection for Copeland Scroll compressors

A superior replacement for traditional compressor contactors

This new innovation combines the functionality of a mechanical contactor with CoreSense technology to deliver unparalleled reliability, savings, and intelligence.

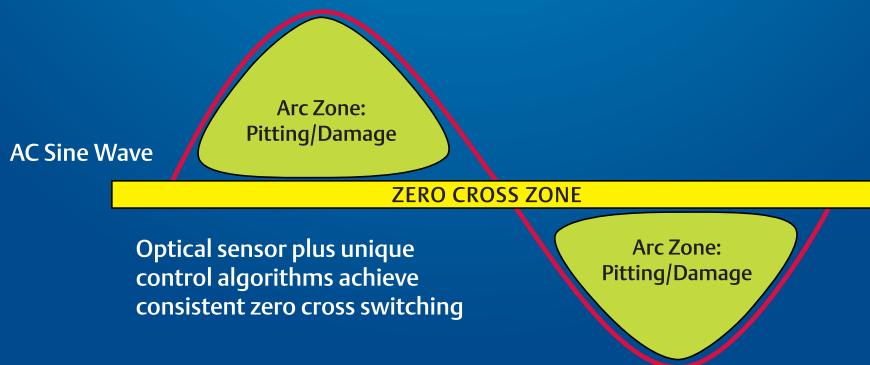

Model #
ESC1AFPT-CC-901

Benefits

- 5x contactor life
- Microprocessor control nearly eliminates welding and pitting
- Sealed to keep out pests and debris
- Actively shuts down the compressor when critical system faults are detected
- Six diagnostic codes enable greater speed and accuracy of troubleshooting
- Stores system and fault history for download
- Same wiring as traditional contactor
- Ideal install with new preventative maintenance contracts
- Reduces callbacks and provides homeowner peace of mind

Applications

- Single-phase air conditioning and heat pump systems
- Superior replacement for single and two pole, 30 or 40A contactors
