SUBJECT: Dixell Universal Replacement Controller (XR60CX)

We are pleased to announce the release of the Dixell Universal Replacement Controller on November 26, 2018. These controllers will be distributed and sold out of Mt. Comfort. The controllers will have three-part numbers, which will be available to be purchased out of Mt. Comfort.

- 943-0291-00 [XR60CX-4N1F1-UR (120V)]
- 943-0292-00 [XR60CX-5N1F1-UR (230)]
- 943-0293-00 [XR60CX-AN1F1-UR (12/24V)]

The Universal-XR controllers offer a 7-in-1 solution for heating/medium & low temperature /defrost/fans/alarms etc. With just one control, select one of the six pre-se maps in the application menu, and now you have a replacement of virtually any control. It's the one control that is a must have on your shelves and service vehicle. The Universal-XR Advanced Map also allows for total flexibility with inputs and outputs.

Emerson is excited to expand the products available out of Mt. Comfort. Dixell universal controllers are an important addition to Emerson's product offering, which includes the Copeland brand of compressors and condensing units.
