

The mobile toolbox

Emerson X-Check

Cross-reference database for on-the-go access to Emerson™ valves, controls and system protectors. The X-Check app allows mobile users to pull up information based on manufacturer, product type and model number to locate the corresponding Emerson product. Download the Emerson X-Check to your Android™, iPhone® or BlackBerry® device for FREE.

Emerson e-Saver™

Quickly calculate and show homeowners the annual cost savings of high efficiency systems in the palm of your hand. Download the Emerson e-Saver application for your Android or iPhone device for FREE.

Copeland X-Ref™

Provides on-the-go access to Emerson's air conditioning compressor cross-reference database to product specifications and replacement Copeland™ compressors. Users search information using the first three digits of a compressor model number; the application will then provide service data on three Copeland compressor replacement options. Download the Copeland X-Ref 1.0 application for your Android or iPhone devices or Copeland X-Ref 2.0 on your Blackberry device for FREE.

Check & Charge™

Instant mobile refrigerant charge calculator for HVACR applications. To easily calculate correct system refrigerant charge for R-22 or R-410A, simply choose subcooling, superheat, or airflow and enter the specified system temperatures along with the latent and sensible environmental loads. Download the Emerson X-Check to your Android, iPhone or BlackBerry device for FREE.

HVACR Fault Finder

Provides on-site compressor troubleshooting for air conditioning and refrigeration applications, allowing contractors to easily access product specifications for Copeland™ compressors containing electronics. Download to your Android or iPhone for FREE.

Enhanced WRMobile

New, feature based product selection capabilities provide a quick guide to the right model number for the job. Once found, product brochures, wiring diagrams and installation/operating instructions are available where you need them for thermostats, gas valves, and HVAC controls. Update or download the exciting new version of WRMobile for your Android, iPhone or BlackBerry device.

Emerson PTPro

Provides on-the-go access to pressure and temperature conversions. Select a refrigerant and enter a temperature (in C or F) and see what a saturated pressure (in Bar or Psig) will be. You can also enter a pressure and see what the saturated temperature is for that pressure. Download the Emerson PT Pro to your Android, iPhone or BlackBerry device for FREE.
